

## TIER Level III

THEORETICAL - PRACTICAL TRAINING ON CONTROL OF HYDROCARBON  
SPILLS USING MAIN & AUXILIARY MARINE VESSELS AND EQUIPMENT FOR  
OFFSHORE PRACTICES.

## About Us

We are a Company operating since 2011 in the energy & environmental industries; formerly focusing in the provision of specialized equipment & materials for hydrocarbon spill containment, with special emphasis in the petroleum sector.

As part of our commitment with the development of the country, in 2012 we launched a strong process for widening our entrepreneurial vision; therefore beginning a new phase in our operations & services, by offering maritime oil spill response maneuvers, including services in water bodies such as rivers and lagoons. In this way, we confirm our purpose which consists in offering the highest quality & excellence standards for the satisfaction of our customers; thus reinforcing the actions to prevent environmental damage and to preserve ecological balance as well as human health & safety.
